# The **ULTIMATE** Map Machine

Introducing the “*Ultimate Map Machine*”.  
A new installation at Signature Printing Inc.  
“Map Printers to the World”.

The hybrid press has all the quality and flexibility of sheet fed offset printing, with the additional paper and time savings normally associated with a web press.

Capable of printing both sides of the sheet in one pass from either rolls or cut-sheets at truly amazing speeds, this press was specifically configured to be the ultimate map machine.

Automatic makeready; computerized ink dispensing; full integration with our state of the art computer to plate system assures that nothing has to be compromised to attain the ultimate in map and road atlas production.

Combine this new capability with our post press processes that give you the binding format you need; the coating, laminating and diecutting that makes your product unique and you'll see that our versatility is second to none.
